

The PCDL is aimed at anyone wishing to gain the skills necessary for demonstrating to potential employers that they are able to use a PC effectively and productively.

The PCDL contains a carefully selected range of modules from the New Zealand Polytechnic Qualifications in Business Computing (Blue Book). The detailed content of these modules may be viewed at:

www.pcdl.co.nz or
www.naccq.ac.nz

These modules ensure that the original European concept - European Computer Driving Licence (ECDL) - is adhered to and that the programme includes the appropriate level and breadth of subjects.

Subjects include multimedia, local area networks, the Internet, software applications, operating systems and hardware fundamentals.

The PCDL is offered as a stand-alone programme, or is incorporated into other programmes, in a number of tertiary institutions/polytechnics throughout NZ. Anyone wishing to enrol in the PCDL should inquire at their nearest Polytechnic or email the National Advisory Committee on Computing Qualifications (NACCQ) executive officer at:
info@naccq.ac.nz

Graduates of the PCDL are issued with a licence and with a key tag from NACCQ that confirms their competency to drive a PC in an effective and competent manner.
